

## Microsoft PowerPoint 2002 (XP)

### **The Need: Increased Competence in Microsoft PowerPoint Software**

Almost every company can benefit from having employees maximize their proficiency with essential desktop software applications such as Microsoft PowerPoint.

Whether you are seeking entry-level training for new hires or advanced training to facilitate transition to new roles, comprehensive employee training in this critical office application is essential to maximize productivity across a wide range of job roles.

In most cases, helping your employees in key roles to move beyond a basic understanding of Microsoft Office tools and into the time-saving intermediate and advanced features will yield sharp productivity increases.

In short, any workforce can benefit greatly from improved proficiency with Microsoft PowerPoint.

### **The Solution: Maximize Employee Productivity with Targeted Desktop Software Training**

E-learning is the perfect solution for Microsoft Office training: the

courses are cost-effective, convenient, interactive, and consistent. Training is offered at every skill level to provide your employees with comprehensive coverage of both basic and sophisticated features.

Through CyberU's Online Training Center (OTC), companies can select and deliver effective training for the familiar software tools of the Microsoft Office suite: Word, Excel, PowerPoint. Courses are packaged into three-course bundles to provide each employee with training at increasing skill levels – employees can boost proficiency in each application quickly and cost-effectively.

### **Microsoft PowerPoint 2002 (XP) - Classes:**

**Microsoft PowerPoint 2002 (Office XP): Introduction** - In this course, you'll explore the basic skills for creating a presentation in Microsoft PowerPoint. You will create and edit bullet slides, use PowerPoint's drawing tools, incorporate clip art and WordArt, create and enhance organization charts, and create and edit charts by using Microsoft Graph.

**Microsoft PowerPoint 2002 (Office XP): Advanced** - In this course, you'll explore the advanced features of Microsoft PowerPoint, including customizing templates and the PowerPoint environment and making a presentation interactive by using hyperlinks. You will enhance a presentation by using custom clip art, animation, and movies, and work with embedded and imported objects using Microsoft applications.
